Teacher Christine Bergman

School Miami Beach Senior High School | Miami Beach, Florida

Issue Providing that academic assistance needed in order to motivate the students as well as to inform them of what academic courses they could take, so they could advance in their studies, as well as motivate them to become involved in a variety of activities. Since some families work long hours or multiple jobs they tend to leave the students to fend for themselves in the education department.

Project Description The mission of my project is to develop a culture of success by preparing all middle school students for high school and college readiness. I have educated the principal of Ruth K. Broad K-8 Center named Dr. Rodriguez; Mrs. Bergman a teacher at the school; and Miami Beach Senior High School. I am planning on expanding my project this year as well to Finberg Fisher. All the contacting took some time. I arranged meetings with the principal of Bay Harbor and discussed the program with her. She kindly accepted my idea and I started motivating the students to join the program by making announcements and creating flyers. In Miami Beach Senior High, which is where the program started, I spoke to a teacher named Mrs. Garcia and arranged a little tutoring group that expanded to what it is today.

Project Outcome My project has so far had many positive outcomes, based on the feedback I have been receiving from the teachers at Ruth K. Broad K-8 Center. Here is one example: Mr. Moss a math teacher said, "The program has truly benefited the students at this school, I have seen many of my students show a great change in their attitudes and grades."

Request I would love to know what the senators and representative think about my project. I would like a lot of feedback, so I could improve my project for the better. Like things that involve information about the education system, so I could know and share with the kids, or something I could share with them about the Congress and its senators and representatives.
